### 📁 PROFESSIONAL EXPERIENCE

#### HP Inc.

**Solutions Software Engineer - Senior - Go|Vue.js|Docker|Java|PostgreSQL**

04/2025 - Present | Austin, TX

##### [Mini-Dash Disney]

- **Architected and delivered a greenfield full-stack monitoring solution for Disney**, leading the end-to-end lifecycle from stakeholder requirement gathering to final production hand-off using **Go** and **Vue 3**.
- **Spearheaded a strategic migration from Windows Server to RHEL (Linux)**, leveraging **Docker** and **Bash** automation to containerize the environment, which simplified client deployment and improved system reliability.
- **Engineered a real-time global health dashboard** that synchronized metadata from legacy Windows servers with live hardware APIs, directly resulting in a **\$150k revenue gain** and a multi-year contract renewal.

##### [On-Prem Real-Time Monitoring Modernization]

- **Modernized a legacy analytics platform for government agencies**, refactoring cloud-based source code into a secure, **air-gapped** standalone solution using **Docker Compose** and **FIPS-compliant encryption**.

##### [Mini-Dash FINRA]

- **Developed high-performance data visualization tools for FINRA** using **Go** and **Chart.js**, enabling real-time tracking of peak network bitrates and hardware health across global building locations.

#### Charles Schwab

**Software Engineer III - Senior - C#|AWS|Typescript|.NET|React|SQL|Splunk**

01/2022 - 04/2025 | Austin, TX

##### [Schwab.com] User Navigation Initiative

- Led the design and implementation an improved user navigation system, displaying accurate navigation data and product recommendations in a SPA and MPA system, expanding coverage to 99% from 70% across all of Schwab.com ☑ while removing external team dependencies

##### [Schwab.com] Global Navigation

- Proactively monitored and maintained critical components using Splunk and Grafana, identifying and resolving performance bottlenecks that improved system responsiveness by 8% during peak traffic. Worked closely with cross-functional teams on a daily basis, including developers, product managers and business stakeholders to ensure the best user experience at a global scale
- Ensured system-wide upgrades of outdated libraries, enforcing security standards across the system. Work closely with performance team and security team

##### [Schwab.com] .NET MVC Migration to Micro-Service

- Developed new, cloud-based C# API end-points responsible for sending metadata accross multiple services, resulting in a 20% reduction in service response time and enabling 2x faster deployments through the adoption of a microservices architecture

##### [Schwab.com] Language localization

- Led the implementation of a new language schema expanding accessibility to international clients (Singapore, Hong Kong) while maintaining page load times and ensuring proper system backend code refactoring

##### [Schwab.com] SmartBanner Feature

- Reduced daily API calls from *3 million* to *1 million* resulting in 2% cost reduction, improved page load times by 10%, reducing user bounce rate by 4%

**Associate Software Engineer - Java|SQL|SpringBoot|Hibernate**

08/2016 - 01/2022 | Austin, TX

##### 10b5 system refactor

- Led the redesign of a critical client data store system, replacing a legacy spreadsheet-based model with a Java-backed MySQL persistence layer, mitigating potential millions in risk of data loss and improving data accessibility for downstream systems
- Collaborated with high visibility team leadership regularly to research and design solutions
